Japanese Cultural Preservation Meets Cross-Chain DeFi

What Is Dragon Bit?

Dragon Bit (DGBT) is a multi-chain Japanese cultural ecosystem built on Solana and Kaia blockchain. Whether you're trading, farming, collecting, or just here for the culture—you're supporting Japanese mythology preservation through authentic intellectual property and nonprofit backing.

Born from the legend of King Ryujin, the Dragon King of the Sea, Dragon Bit represents 50 million fragments of his eternal treasure hoard. With trademark protection, fixed scarcity, and 20 million tokens locked with Mashiyu Foundation USA (501c3 nonprofit), this isn't just another token—it's a cultural movement in the digital age.

Token Fundamentals

Solana (DGBT)

Contract: CU7GxngHPFpVxLpEmzdkxtTRt2uVdVSLNFVygNkbmSFU

Total Supply: 50,000,000 DGBT (fixed forever)

Mint, Freeze, & Update Authority: Permanently Revoked

Kaia (DGBTK)

Contract: 0x5512fc68a098ff57204ce78c9dfa04fc084d1a38

Cross-Chain Supply: 5,000,000 DGBTK (initially minted, pegged to locked DGBT)

Intellectual Property Protection

Registered Trademark: Dragon Bit™ (USPTO Serial No. 99521777)

This legal protection distinguishes Dragon Bit from copycat projects and demonstrates serious long-term commitment to the brand and community.

Cross-Chain Expansion: Dragon Bit Kai

Dragon Bit Kai (DGBTK) is our strategic expansion into the East Asian market via Kaia blockchain. Rather than using traditional bridges or wrapped tokens that create friction and complexity, we've implemented a direct supply peg system that's elegant and transparent.

How the Peg System Works

Lock DGBT on Solana → Mint DGBTK on Kaia

We locked 5 million DGBT on Solana and minted 5 million DGBTK on Kaia. The combined supply across both chains always respects our 50 million cap. As we lock

more DGBT, we can mint additional DGBTK. As DGBTK burns, we can unlock corresponding DGBT.

Supply Equation:

$$\text{Locked DGBT} + \text{Circulating DGBT} + \text{Total DGBTK} \leq 50,000,000$$

This system is simpler, more transparent, and gives us flexibility to serve two distinct markets without wrapped token complexity or bridge security risks.

Token Distribution (Estimation)

Mashiyu Foundation USA: 20,000,000 DGBT (40%)

Initial Distribution: 8,000,000 DGBT (16%)

Development/Rewards Pool: 8,500,000 DGBT (17%)

Raydium Liquidity: 8,000,000 DGBT (16%)

Dragon Bit Kai Lock: 5,000,000 DGBT (10%)

Orca Genesis Pool: 500,000 DGBT (1%)

Nonprofit Partnership

20 million tokens are locked with Mashiyu Foundation USA via Streamflow with a 5-year vesting schedule (1-year cliff, then monthly releases). This ensures sustainable funding for Japanese cultural preservation programs including digital archives, educational grants, artist support, and language initiatives.

Vesting begins November 1, 2026, providing long-term alignment between ecosystem growth and cultural mission fulfillment.

DeFi & Liquidity

Dragon Bit maintains deep liquidity across multiple platforms:

Solana Pools

Raydium CLMM (SOL/DGBT)

Pool ID: EoraakEAomcoDbeWYJtncFj6X7ZZDgQ3GYi58A7Khn8Z

Raydium CPMM (SOL/DGBT)

Pool ID: JB4c5RiRwarcCvpJri6CjwaWF6wFmnJWtwJ6rsmZy9u2

Orca LP (USDC/DGBT)

Pool ID: 8bVvQxQddiMaKPV7B4K6LbVx6bnphjwYybrZdcjcG4jd

Kaia Pools

Dragon Bit Kai pools will be announced upon launch. Initial focus on KAI/DGBTK and stablecoin pairs for maximum accessibility in East Asian markets.

The Cultural Mission

At the core of Dragon Bit is japan.je (The Japanese Experience)—a comprehensive digital platform preserving Japanese mythology, folklore, and cultural heritage.

Every transaction, trade, and farm rewards contributes to cultural preservation through Mashiya Foundation USA. This creates a virtuous cycle where DeFi activity directly funds:

- Digital archives of Japanese folklore and traditional stories
- Educational grants for Japanese culture and language studies
- Artist support for traditional Japanese themes
- Community cultural celebrations and workshops
- Museum partnerships and physical cultural preservation initiatives

Roadmap

Q4 2025: Foundation

- ✓ Token mint & initial liquidity
- ✓ Trademark registration
- ✓ Foundation lockup via Streamflow
- ✓ Litepaper release
- ✓ Raydium pools launch
- ✓ Jupiter aggregator listing

Q1 2026: Cross-Chain Expansion

- ✓ Dragon Bit Kai (DGBTK) launch on Kaia
- East Asian market partnerships
- ✓ Yield farming opportunities
- japan.je content expansion

Q2-Q4 2026: Community Growth

- Foundation vesting begins (Nov 1, 2026)
- First cultural preservation grants
- Strategic institutional partnerships
- Community-driven ecosystem expansion

2027 & Beyond: Community-Driven

The future of Dragon Bit belongs entirely to its community. Possibilities include deeper cultural initiatives, gaming integrations, educational partnerships, and real-world activations—all determined by holder participation and organic growth.

Risk Disclosure

Dragon Bit is a speculative digital asset. Cryptocurrency markets are volatile. Past performance doesn't guarantee future results. Regulatory frameworks are evolving. Smart contracts carry technical risks. Yield farming involves impermanent loss. Only participate with capital you can afford to lose.

Join the Dragon King's Legacy

Dragon Bit isn't just a token—it's a bridge between ancient mythology and modern finance, between cultural preservation and decentralized innovation.

With trademark protection, cross-chain expansion, nonprofit backing, and authentic cultural mission, Dragon Bit offers multiple pathways: trade, farm, collect, learn, or simply hold a piece of digital history.

King Ryujin has extended his gift across two blockchains.

What you do with it is up to you.

May your hoard grow eternal.
